Washington, DC

# Weekly Coal Production

Production for Week Ended:  
December 24, 1988

# Summary

U.S. coal production in the week ended December 24, 1988, as estimated by the Energy Information Administration, totaled 19.8 million short tons, almost unchanged from production in the previous week. This week's coal output was 6.4 million short tons or 47.9 percent higher than in the corresponding week of 1987, which had its production affected by the Christmas holiday.

This report contains data on electric utility coal receipts and prices for September 1988 in addition to electric utility coal consumption and stocks for October 1988. Also included are data on U.S. coal and coke exports and imports for October 1988.
